

# VELO 1 | 4MB

## H A N D H E L D P C

Winner

Now you can run Windows® anywhere and everywhere. The Velo 1 Handheld PC runs Microsoft® Windows® CE and "pocket" versions of Windows applications you already know, like Word™, Excel™ and Internet Explorer™. Besides that, it has everything you need to surf the web, tie into corporate e-mail, send faxes, organize your files, track your schedule, record notes and yes, even play Solitaire . . . in places you never could before.

The Velo 1 Handheld PC packs almost everything you need from your desktop into a small 6 3/4-inch case for the road.

It's built for Windows CE, the pocket version of Windows® 95. But it also has Pocket Word, Pocket Excel, Pocket Internet Explorer. . . along with software for corporate e-mail, a database, voice recording and scheduling.

Because it's compatible with Windows, you already know how to use it. And you can work just like you do on your office PC—no matter where you happen to be.

Yet, thanks to the exceptional communications capabilities of the Velo 1, you'll always be connected. There's a low power 19.2 Kbps modem built right in and all the necessary communications software. So you can fax, send e-mail and connect to the World Wide Web. Or even communicate with yourself by using the Velo Voice Memo, which lets you record messages, organize them and even drag them onto your PC.

Unlike any other handheld PC, the Velo 1 is upgradeable and expandable in three different ways. With two industry-standard Miniature Card slots, you can add more DRAM, Flash memory or even ROM software upgrades. At the same time, thanks to the open Velo CT architecture, you can add V-Modules such as the Type II PC card slot. And V-Modules for new technologies as they're developed by us and third-party developers — to add even more functionality.

**Get in sync.**

The Velo Dock easily uploads, downloads and synchronizes what you do on the road with your office PC . . . and then charges an optional NiMH battery pack at the same time.

Safe to say, with the Velo 1, you can run Windows anywhere. And even go a lot of places you never could before.

Designed for

Microsoft® Windows® CE

**The stuff you need.**

You don't have to go through six screens to get to what you really use. Just press a Quick Start key combination and the application is automatically launched.

**Audio in.**  
Omnidirectional microphone used in conjunction with Velo Voice Memo application.

**Weight XX.X oz. (with batteries)**

**Indicator lights.**  
Let you know when the Velo 1 is charging, communicating, and receiving alarms or messages.

**Velo Voice Memo.**  
Just press the button and talk into it. With Windows 95 compatible sound compression, you can record up to 16 minutes (per 1MB of storage) of thoughts and then organize them or put them into documents.

**3 3/4"**

**Innovative bloodline.**  
The Velo 1 is the first of an entire line of mobile computing devices from Philips.

**Low-profile RJ-11 jack.**  
A phone jack that fits the Velo 1 streamlined design.

**Backlight button.**

**Contrast dial.**

**Backlit, non-glare touchscreen display.**  
Grayscale LCD (480x240 pixels, .24mm dot pitch, .23mm dot size) and on-demand backlighting, complete with a contrast dial.

**Stylus pen.**  
Touch the screen and the Velo 1 is at your command.

**Quick Start keys (10).**  
You can jump start all your applications with the touch of a key on the Velo 1 61-key QWERTY keyboard.

**High performance 3.3V 32-bit MIPS R3910 RISC processor @ 36.864 MHz.**  
Designed for fast access and high throughput of Windows CE applications.

**Audio speaker.**  
For .wav file playback.

**Memory with room to spare.**  
The Velo 1 can support an additional 100MB of memory.

**Miniature Card slots.**  
Two industry-standard expansion slots for more DRAM, Flash memory or even ROM software upgrades.

**Built-in 19.2 Kbps V.32 bis/ter data/fax modem.**  
Uses almost no power so you won't run out of steam just when you get into web surfing.

**DC jack.**  
(12V @ 500mA).

**High-speed I/O.**  
RS-232 serial port up to 230 Kbps.

**Fast on-board memory.**  
4MB EDO DRAM and 8MB Fast Page Mode ROM.

**IrDA infrared transceiver (up to 115 Kbps).**  
You can send files or messages to other handheld PCs or IrDA-compatible devices.

**Power (battery compartment).**  
Runs for about 15 hours on two AA batteries or a NiMH rechargeable battery pack. (Battery life varies with usage).

**CR2032 lithium backup battery.**

**Expansion for V-modules.**  
Simply add an optional Type II PC Card V-Module for wireless modem, global positioning systems or in the future, other modules.
